New location next to Utrecht CS main railway station

This year, Business Centre Nederland (BCN) is to open a new location in Utrecht: BCN Utrecht CS. This modern conference centre has 27 multifunctional spaces, all with AV facilities and free fibre optic Internet throughout the building. BCN is easily accessible due to its location near the main railway station.

Innovative spaces

The new venue also has fully equipped computer classrooms and is thus suitable for IT training courses, digital exams or Social Media training courses. The rooms are suitable for groups from 2 to 100 persons and have modern presentation equipment and free fibre optic Internet. From November, the other BCN location will also be converted to optical fibre Internet and provide the option to hire fully-furnished computer classrooms.

Sustainable locations

BCN is making an effort to make the meeting market more sustainable, which is also expressed by the supply of catering products. An increasing part of purchasing is entirely socially responsible and organic. The meeting halls use paper with the FSC trademark only.

Moving towards the golden Green Key

In late 2010, BCN took the step to only serve Good Origin coffee on all locations within BCN. Products on the menu and in the extensive lunch buffet are also increasingly of organic origin. In addition, BCN has converted all of its locations to 100% sustainable electricity, a considerable part of which is obtained from wind energy. BCN's objective is to obtain a golden Green Key for all locations in 2012.
